

**PXX-PBUS : The extension module** allows connecting installed PTM-I/O modules to PXC50/100/200...D automation stations, making them the perfect solution to migrate legacy systems.

| PXX-.. device         | Type     | Data sheet |
|-----------------------|----------|------------|
| PBUS extension module | PXX-PBUS | CM1N9283   |

**Note:** One supply module TXS1.12F10 is required as bus supply for the P-bus for each P-bus strand. A TXS1.12F10 can supply max. 64 load units (1 LU = 12.5 mA, DC 24 V)

#### TXA1.IBE : Remote IO Islands with Integration

Easy to use solution via simple adapter for remote TX-I/O and TX Open. No programming/ parameterization required.

| Device                      | Type     | Data sheet |
|-----------------------------|----------|------------|
| Island bus expansion module | TXA1.IBE | CM2N8184   |

### Device combinations with the automation stations

#### Designo Control Point

| Device                                                                                                        | Type             | Data sheet  |
|---------------------------------------------------------------------------------------------------------------|------------------|-------------|
| BACnet touch panels with integrated data management and web server functionality:<br>7.0 "<br>10.1 " , 15.6 " | PXM30.E          | A6V10933111 |
|                                                                                                               | PXM40.E, PXM50.E | A6V10933114 |
| BACnet/IP web server with standard functionality                                                              | PXG3.W100-1      | A6V10808336 |
| BACnet/IP web server with enhanced functionality                                                              | PXG3.W200-1      |             |
| Client touch panels with data management in the PXG3.Wx00-1 web server<br>7.0 "<br>10.1 " , 15.6 "            | PXM30-1          | A6V10933111 |
|                                                                                                               | PXM40-1, PXM50-1 | A6V10933114 |

#### Operator units for automation stations

|                                                                 | Type    | Data sheet |
|-----------------------------------------------------------------|---------|------------|
| Local operating unit                                            | PXM10   | CM1N9230   |
| Network operator unit in a BACnet/IP network <sup>1)</sup>      | PXM20-E | CM1N9234   |
| Network operator unit in a BACnet/LonTalk network <sup>1)</sup> | PXM20   | CA1N9231   |
| Cable (3 m) between PXM10 or PXM20 and PXC....D                 | PXA-C1  | --         |

<sup>1)</sup> In the case of a PXC....D automation station, one PXM10 and one PXM20 operator unit may be connected, but not twice the same type.

#### Accessory

|                               |        |
|-------------------------------|--------|
| Adapter for Firmware download | PXA-C2 |
|-------------------------------|--------|
